⌈ Function, array, matrix ⌋

NB : use good practice for naming and write code [1]*!!!*

⌞ Problem 1 ⌝

Write the following functions :

- Caesar cipher `https://en.wikipedia.org/wiki/Caesar_cipher`

- Vigenere cipher `https://en.wikipedia.org/wiki/Vigen%C3%A8re_cipher`

In the main file add the necessary code to test and validate your encryption

⌞ Problem 2 ⌝

Create functions to inverse the encryption to your "Cripto" classe.
